PRECAUTIONS BEFORE USING

Please read the User's Manual before using. It gives you important information about how to operate the portable radio.

Please put the radio and accessories where the children can not touch.

Maintenance can only be performed by professional technicians.

Please use the standard battery pack and charger in order not to destroy the radio.

Please use the standard antenna, in order not to shorten the distance.

Do not expose the radio to sunlight for a long period of time, nor put it near the heat, nor use it in a high temperature environment.

Do not put it in extreme dust nor wet or on unsteady surfaces.

Keep it dry. (Rain or moisture will erode the electronic board).

Do not transmit when the antenna is not installed.

If you find bad smell or smog, please turn off the radio immediately. And take the battery off the radio, then contact with QS agent.

FEATURES

- ☐ CTCSS
- ☐ DCS
- ☐ Scan function
- ☐ Dual-watch operation
- ☐ Reminder after transmitting
- ☐ H/L output power selective
- ☐ 200 channels
- ☐ PC programmable
- ☐ Channel name edit
- ☐ Busy channel lock (BCLO)
- ☐ VOX function
- ☐ Receiving signal indicator
- ☐ Battery capacity indicator
- ☐ 1750Hz call tone
- ☐ Voice prompt (Chinese and English)
- ☐ FM radio
- ☐ Cable clone
- ☐ Alarm function
- ☐ LCD backlight adjustable
- ☐ Squelch level adjustable
- ☐ Channel lock mode
- ☐ Channel scan list edit

CHARGING NOTES(1)

Charging the battery pack:

- Battery packs are not charged when they are shipped. Charge them before use.
- Initially charging the battery pack after purchase or extended storage (longer than 2 months) will not bring the battery pack to its greatest capacity or its normal charge, which can be done only after repeated charging and discharging two or three times.
- The average use time of battery pack is 10 hours

1. After the battery is charged to its highest capacity, and then used on the radio. If the radio still shows low power, please change a new battery pack.
2. Do not short-circuit the battery terminals or throw the battery into fire.
3. Never attempt to remove the casing from the battery pack.

www.409shop.com

CHARGING NOTES(2)

- Plug the AC adapter into the back of the charger. Then plug the power cable of the charger into 220V power.

- Slide the Li-ion battery pack or radio with a Li-ion battery pack into the charger.

- 1 Make sure the battery pack is in connected with the charging terminals.
 - 2 When charging begins, the RED LED light displays.
- When the battery pack is charged to its greatest capacity, GREEN LED light displays.

- After the GREEN LED light displays, take the battery pack or the portable radio out of the charger.

ATTACHING/RELEASING BATTERY PACK

Slide the battery pack into the back of the radio in the direction of the arrow(①), then lock it with the battery release button. Slide the battery pack until the battery release button makes a "clicking" sound.

Turn off the radio before releasing the battery pack.

- Push the battery release button in the direction of the arrow(②) as shown below.
- The battery pack is then released.

INSTALLING ANTENNA

- Attach the antenna to the radio as illustrated on the right.

INSTALLING BELT CLIP

- Attach the belt clip with the supplied screws using a phillips screw driver.

To attach the belt clip

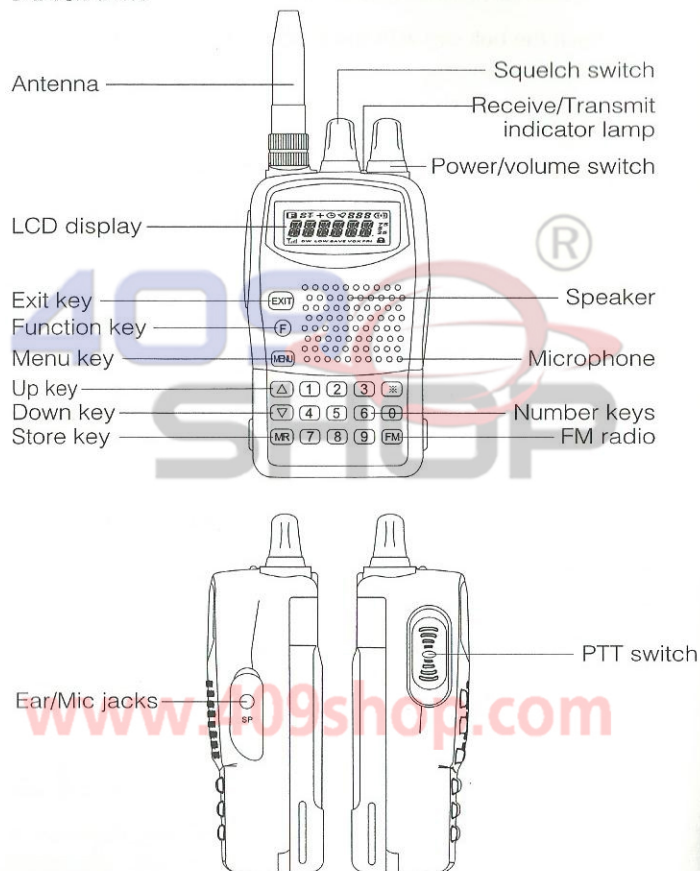

INSTALLING EXTERNAL SPEAKER/MICROPHONE

- Insert the speaker/microphone plugs into the speaker/microphone jacks.

The radio is not fully rain-resistant while using the external speaker/microphone.

BASIC OPERATION

- Turn the Power/Volume knob clockwise to turn the power on. (As P-1)
- Turn the Power/Volume knob counter-clockwise to turn off the radio. (As P-2)

P-1

P-2

- To make a call, press and hold the "PTT" switch, then speak into the microphone in normal speaking tone. Hold the microphone approximately 1.5 inches (3-4cm) from your lips.
- Release "PTT" to receive signals.

TRANSMITTING

- Press and hold the (PTT) key to make a transmitting.

Notice: If the frequency you set is over the range, the radio will "beep" when you press (PTT) key.

Transmitting indicator lighting during holding down (PTT) key. If you are too close to the microphone or your voice is too loud, it is not clear in receiving.

Setting output power

- Press (F) + (I) ,to choose the output power between "H" and "L"
- "H": High power 
- "L": Low power 
- Pls set low power to keep steady work and save battery.

CHANNEL STORE

- Input frequency

If the new frequency is hundreds of KHz or more from the current frequency, and you don't have the new frequency stored in any memory channels, pls input frequency directly by numeric keypad.

- 1 Press (MR); Inputting frequency only available in full frequency mode.
- 2 Pressing keys (0) ~ (9) to enter the desired frequency.

For example: Enter 409.750MHz

| Press | | | Display |
|-------|-----|-----|----------|
| (4) | (0) | (9) | 409.---- |
| (7) | (5) | (0) | 409.750 |

NOTICE: If you can not input the frequency accurately. Pls check whether you set the correct step frequency or not.

- In frequency mode, press (MR) for more than 2s, then press (▲) or (▼) to choose the channel, press (MR) to confirm.

Channel 0~199 are available.

CHANNEL STORE

- Choose store channel

1. In frequency mode, press (MR) for more than 2s to channel mode, then press (▲) or (▼) to choose the desired channel.

2. Press (MR) to confirm.

- Clear store channels

1. Choose the channel you want to delete, press (MENU), then press (▲) or (▼) to enter MENU No.15 "DEL".

2. Press (F), then press (▲) or (▼) to choose "YES" then press (F) to confirm.

3. Press (EXIT) to return to channel mode.

www.409shop.com

FAST MODE

All operations must be in frequency mode.

- Scan:

Press (F) + (MR) to start scan function.

- TX Power:

Press (F) + (1) to choose TX Power level at "H" and "L".

- 1750Hz Call Tone:

Press (F), then press (PTT) to transmit 1750Hz call tone.

1750

- FM Radio:

Press (F) + (FM), then press (▲) or (▼) to choose the FM frequency.

- Check RX CTCSS/DCS:

Press (F) + (2).

023

FAST MODE

- Check TX CTCSS/DCS:

Press (F) + (3).

123

- Reverse Function:

Press (F) + (5), the RX and TX frequency will be exchanged.

409.750

- Dual-Watch Operation:

Press (F) + (8), it displays "DW" to open the dual-watch function on channel 0 and the current channel. Press (EXIT) to exit.

01 410.050

- Alarm Function:

Press (F) + (9) to send alarming, press (PTT) to exit.

- Keylock Function:

Press (F) more than 2s, keypad lock. the LCD display "KT". Operate it again, the keypad unlock.

409.750

WHAT IS A MENU?

- You can reset all the functions of this radio by MENU.

MENU SET UP

- Press **(MENU)** to enter Menu Set up.
 - Press **(▲)** or **(▼)** to select the menu item.
- Press **(▲)** or **(▼)** to select the menu item, the LCD displays the brief description and current parameter.
 - Press **(F)** to set the parameter of current menu.
 - Press **(▲)** or **(▼)** to choose your desired parameter.
 - Press **(F)** to store new set.

www.409shop.com

MENU FEATURES LIST

| NO. | MENU | SELECTIONS | DESCRIPTION | REMARK |
|-----|---------|--------------------------|--|--------|
| 1 | STEP | 5/6.25/10/ 12.5/25/50 | | * |

| 18 | reset | VFO/ALL | Reset | * |

NOTICE: It's better to rotate the squelch potentiometer to the end clockwise for avoiding the noise when you use the radio.

ASSISTANT FUNCTION

Busy Channel Lock Function

- This function is to avoid transmitting at the current used channels .

When this function on, press (PTT) , the radio will beep, and LCD displays "BUSY" , it will not transmit.

Vox Function

- When this function on , the system will inspect your talking to the microphone and then it will automatically shift to transmitting mode without manual operation.
 - Press (MENU) , then press (▲) or (▼) to choose Menu No.3 "VOX" .Press (F) ,then press (▲) or (▼) to choose from "off " / "1~9" levels.Press (F) to confirm.
- 1 "OFF" is turning off VOX function.
 - 2 "1~9" is the VOX levels.

Time-Out-Timer (TOT)

- This feature allows more efficient use of channels by limiting the time of each transmission
- 1 Press (MENU),then press (▲) or (▼) to choose Menu No.10 "TOT".
 - 2 Press (F) , then press (▲) or (▼) to choose 1~10 levels.
Level "1" is 30s, and it will stop transmitting after 30s.
 - 3 Press (F) to confirm.

ASSISTANT FUNCTION

Reset Function

- In frequency mode, press (MENU) , then press (▲) or (▼) to choose Menu No.18 "RESET".
- Press (F) to choose "VFO".
- Press (F) to choose "YES", Reset is done.
- Choose "FULL" to reset completely .

Pc Programmable Function

Cable Cloning

- Connect master radio and sub-master radio with cable
- Press (MENU) and (PTT) , then turn the power on at the same time, it displays "COPY" .
- Press (PTT) of master radio , it begins to copy, the LED of submaster radio glitters.
- When clone finished, turn the power off .

OPERATING THROUGH REPEATERS

- Most repeaters use an offset frequency between the reception and transmission.

Some repeaters can ONLY receive the signal with correct tone of the radio.

For details,consult your local repeater reference.

OFFSET PROGRAMMING FLOW

- Select a receive frequency.

- Select an offset direction

Firstly, confirm the transmission frequency is higher(+) or lower(-) than the reception frequency.

- 1 Press **(MENU)**; then press **(▲)** or **(▼)**, select Menu No.6 "PRT";
- 2 Press **(F)**; then press **(▲)** or **(▼)**, select "OFF" / "+" / "-";
- 3 Press **(F)** to confirm.

- Select an offset frequency

- 1 Press **(MENU)**; then press **(▲)** or **(▼)**, select Menu No.7 "PRTSHF"
- 2 Press **(F)**, then keypad frequency input directly. The selectable range is from 0-70MHz
- 3 Press **(F)** to confirm.

- Activating/Receiving CTCSS or DCS

- 1 Press **(MENU)**, then press **(▲)** or **(▼)** to Menu No.4;
- 2 Press **(F)**, it displays OFF, then press **(MR)**, it displays CT code, then press **(▲)** or **(▼)** to choose CT code;
- 3 Press **(F)** to confirm.

- DCS

- 1 Press **(F)** + **(MR)**, it displays DCS code, then press **(▲)** or **(▼)** to choose DCS code.
- 2 Press **(F)** to confirm.

- Activating/Transmitting CTCSS or DCS

- 1 Press **(MENU)**, then press **(▲)** or **(▼)** to Menu No.5.
- 2 The following is the same operation of Receiving CTCSS/DCS.

REVERSE FUNCTION

- Setting this function, the receive frequency is exchanged with the transmit frequency.

When used a repeater, it's possible to check the signal strength of a station accessing the repeater. If the signal of the station is strong, it's best to move to a simplex frequency to continue the contact and free-up the repeater.

In frequency mode, press **(F)** + **(5)** to turn NO/OFF the reverse function.

SPECIFICATIONS

GENERAL

| | |
|-----------------------|----------------------------------|
| Frequency Range | VHF:136~174MHz or UHF:400~470MHz |
| Frequency Sensitivity | 5ppm |
| Memory Channel | 200 |
| Antenna Impedance | 50Ω |
| Loudspeaker Impedance | 4Ω |
| Dimensions | 80mmX50mmX30mm |

TRANSMITTER

| | |
|-------------------------------|--------------|
| Output Power | 5W |
| Modulation Mode | 16KΦF3E |
| Max Frequency Deviation | 5KHz |
| Remanent Radiation | ≤7 μ W |
| Audio Characteristics | 6dB/per fold |
| Adjacent Channel Function | 65dB |
| Emission Current | ≤1.4A (H) |
| CTCSS/DCS Frequency Deviation | 0.75KHz |
| Modulation Sensitivity | 12mV |
| Modulation Distortion | ≤5% |

RECEIVER

| | |
|-----------------------|----------------------|
| RF Sensitivity | -121dB (12dB SINAD) |
| Receiver Bandwidth | 5KHz (W) |
| Audio Frequency Power | 0.25W |
| Audio Distortion | ≤10 |
| Blocking | 85dB |

All stated specifications are subject to change without notice or obligation.
